6th Sense Professional Styler
User's Guide

6th Sense Styling Technology

Extraordinary Tools For Extraordinary Hair

Congratulations! And thank you for choosing 6th Sense Styling Technology's new Professional Styler. The plates are where the action is, so we've focused our engineering to make our plates the best in the business. The 6th Sense Professional Styler features:

TOURMALINE CERAMIC TECHNOLOGY:
Provides even heating and a frictionless surface. This gives you a superior straightening result with fewer passes, minimizing hair damage, using less heat for a better result.

MICROCHIP TEMPERATURE CONTROL:
Keeps even heat across the plates to enhance your hair, giving it a shine and luster.

FLOATING PLATES: Provide maximum hair contact and at the same time prevent pinching or grabbing.

30 SECOND HEAT UP: The LED lights tell you when the plates are heated to the temperature set – the highest temperature takes under 30 seconds to fully heat up.

BONUSES: In addition to your 6th Sense Professional Styler, we've thrown in some bonuses:

2-in-1 MINI STRAIGHTENER: You get a $19.99 value flat iron/curling iron – Free - that you can put in your purse and keep bangs in perfect shape and do needed touch ups, on the go. It's dual voltage so can be used anywhere in the world with a plug adapter.

HEAT RESISTANT CARRY CASE a $15.00 value - Free - so you can pack up your styler while hot - no waiting for cool down. It also doubles as a protective pad to lay your styler down on when in use.

4 YEAR WARRANTY: The 6th Sense Professional Styler has been factory tested for 800 hours of use - and we are so confident in our quality that we offer you a full 4-year warranty for defects and workmanship.

**** VISIT OUR WEBSITE **** at https://www.sixsst.com/warranty-registration/
or see the Warranty Registration and Warranty Policy tabs on the navigation menu at www.sixsst.com

6th Sense Professional Styler Warranty Information
The 6th Sense Professional Styler has undergone rigorous testing and has passed up to 800 hours of operation. This durability standard allows us to offer a 4-year warranty on electrical and heating mechanism parts and workmanship.

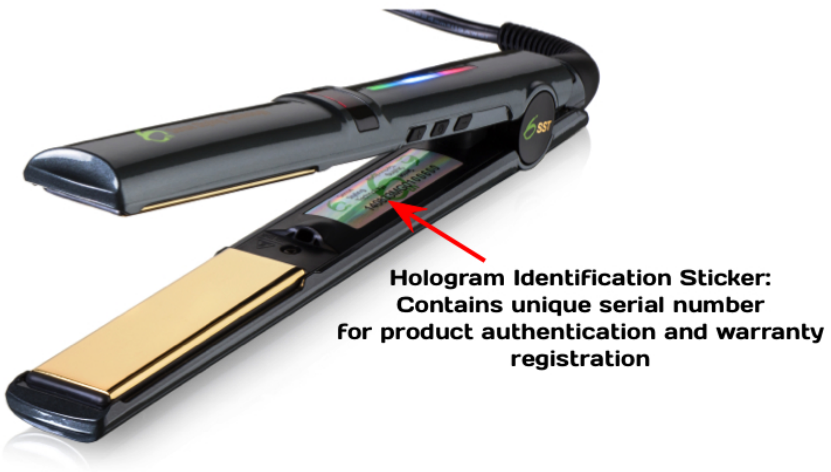
6th Sense Styling Technologies

We require that the product be mailed back to us and we will determine if a) replacement or b) repair is required as our discretion.

In order to make a warranty claim, email al@sixsst.com with your name and serial number and date of purchase and we will give you further instructions on how to mail the product back to us.

Each styler must be registered on our website at https://www.sixsst.com/warranty-registration/ to be eligible for warranty coverage.

Affixed to each 6th Sense Professional Styler is a hologram sticker, inside on the lower arm - that contains your styler's unique serial number.



Go to www.sixsst.com and click the tab: Warranty Registration.

Fill in the requested information, including serial number then, click the green button that says: "Register Your Styler." All records will be filed with 6th Sense Styling Technology and consulted when a warranty claim is made. We never share your information. It is used only for Warranty Registration unless you indicate otherwise.

Additional 90-Day Guarantee:
We also include a 100% satisfaction guarantee - we guarantee that you are happy with our products and service or we give your money back. This also requires return of the product even if you've used it and an email to al@sixsst.com

1. SAFETY:

Before using your straighteners, please read the following instructions very carefully. This appliance heats to an extremely high temperature and the following will safeguard you from any danger from incorrect use.

This product should only be used in strict accordance with the instructions. 6th Sense Styling Technology **will not** under any circumstances, assume responsibility for any direct/indirect/occasional damage caused by the misuse of this appliance.

These damages may include (but are not limited to) earnings lost, profit loss, usage loss, third party complaint cost and cost of equipment and service replacement.

DEFINITIONS:

You will find the following terms in the operating manual that follows. Pay attention to these indications and understand them before you operate your styler.

When you see **- DANGER** it means: High Risk - Failure to comply with this warning may result in serious injury.

When you see **- ATTENTION** it means: Medium Risk - Failure to comply with this warning may result in damage to property.

When you see **- NOTE** it means: Low Risk - Information that should be taken into account when using this appliance.

GENERAL SAFETY:

DANGER: Only use your 6th Sense Professional Styler to style real hair. Do not use on artificial or animal hair. Do not use the heating elements to dry any other objects.

Avoid Wet Conditions

DANGER: Your styler must not be used in bathrooms or in wet or damp conditions.

NEVER use an electrical device in the shower, or bath or near a full or wet washbasin or with wet hands.

DO NOT immerse this appliance in water or rinse under running water. DO NOT use this appliance on dripping wet hair. DO NOT use this appliance near water of any

Copyright © 2105
6th Sense Styling Technologies

kind - basins, sinks, baths, showers or pools of water on counters etc. Ensure your styler is used under dry conditions. Electric shock can result from violation of this point.

DANGER: DO NOT dispose of this appliance as unsorted municipal waste. This product requires special disposal. Contact local authorities for specific disposal instructions for your area.

DANGER: Check the power source and ensure the voltage is compatible with your straightener. The 6th Sense Professional Styler is dual voltage (110V - 220V) but still ensure you verify.

Never switch this appliance on when: The appliance or the power cord is damaged. The device has been dropped, shows visible damage or is not working properly. The appliance is damaged to such an extent that electrical parts are exposed.

If any of the above are visible, disconnect immediately from the power source.

You must unplug the appliance when: A malfunction occurs. You are going to clean the appliance. The appliance is switched off. When the appliance is not being used.

DANGER: DO NOT allow children to use, maintain or play with this appliance. Keep children away from this tool - *it can and will cause severe burns.* Store out of the reach of children including packaging material.

People with medical conditions - where the product may cause them harm if an unexpected attack should occur - must not use this appliance (i.e. epilepsy).

DANGER: Power Cord Precautions - Position power cord so that it is not a hazard. Prevent it from being run over by wheels, chair legs, having heavy or sharp items resting on or falling on the appliance.

If the cord is damaged, only the manufacturer, its service agent or a qualified electrical technician is to replace it. Any and all repairs are to be done by 6th Sense Styling Technology authorized technicians.

Do not disconnect the appliance by pulling the power cord. Use the plug mechanism to disconnect from power.

Do not dangle or hold the appliance by the cord. Hold the tool itself, on the handle away from the heated plates. Clean appliance with a damp cloth when disconnected from power source and fully cooled.

DANGER: Risk of Fire. Never use flammable liquids or gasses near the appliance, including aerosol cans, styling foams etc. To prevent overheating and combustion, never place towels or similar items over or under the appliance.

Do not use styling oil or sprays if there is any damage to heating plates. Do not let paper or other tinder touch heated plates.

Do not use an extension cord with this appliance. The 6th Sense Professional Styler is made for indoor use only.

ATTENTION:

DO NOT put the appliance down on wooden, paper or material surfaces - use a flat heat resistant surface. DO NOT leave this device unattended while plugged in. DO let your styler cool down before putting it away. The included heat resistant carry pouch is designed to hold a warm styler, but you must still be alert to the fact that it is hot and care must be taken.

It is wise to have or have installed electrical leakage circuit breakers where electrical appliances such as the 6th Sense Professional Stylers are in use. Have a licensed electrician install in your home or salon.

This appliance is intended only for use as a hair styling iron and only with products specifically designed for use with a heated styler.

DO avoid contact with hot parts of the tool.

Persons suffering from Dyskinesia should not use this product.

Dry your hands before using this product.

Auto Shut-off: The 6th Sense Professional Styler has an automatic shut off feature should the appliance be left on.

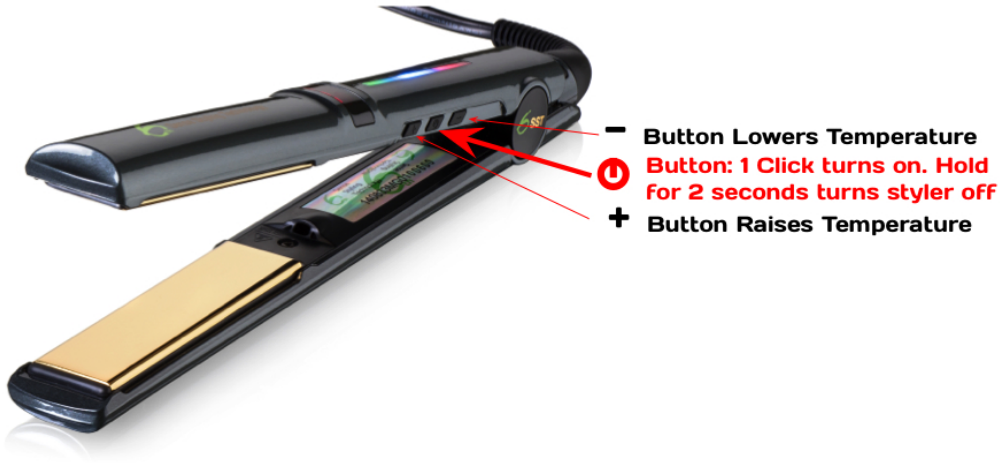
2. Starting Up:

Plugging In:

When you plug in your 6th Sense Professional Styler, the first thing that will happen is the 3 lights will blink, twice - ON, OFF, and ON, OFF again. That signals, that the styler is ready to be turned on.

Turning the 6th Sense Professional Styler On:

To turn the 6th Sense Professional Styler on, click the middle position "On" button.



You will see, in the digital temperature window, the number 355 in red. That number is the middle of the 11 temperature settings.

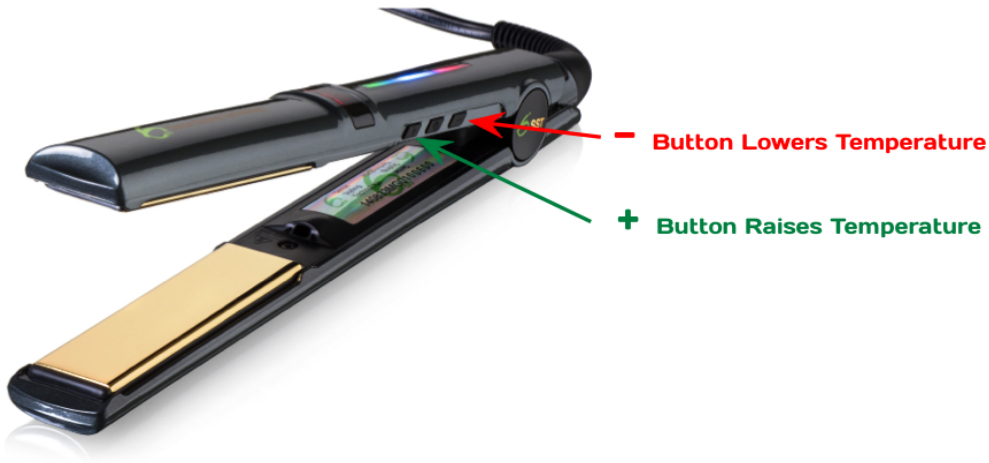
Copyright © 2105
6th Sense Styling Technologies

These 11 temperature settings go from the lowest – 265 degrees, to the highest - 445 degrees – as follows:

- 265 The lowest
- 285
- 300
- 320
- 340
- ➢ 355
- 375
- 395
- 410
- 430
- 445 the highest

You are now ready to set the desired temperature.

Click the + or - button as many times as needed to get to the desired temperature for your hair.



Of course the thicker the hair, the higher the temperature – that's the general rule of thumb. Thinner hair requires cooler temperatures. You will either already know or will need to test to see what temperature is best for your hair.

The correct temperature for straightening is a point of judgment. The ideal scene for hair straightening is a smooth, one pass experience. A correct 1-pass stroke is a

Copyright © 2105
6th Sense Styling Technologies

slow, deliberate pass, with the styler firmly holding a section of hair. You don't want it too hot, generating a burning smell.

The Lights and Temperature:

The 3 LEDs, Red, Blue and Green tell you when the styler is ready for use at the temperature setting you've selected. Here's how they work:

LED Light Guide
Heat Up & Ready Lights

1. Turn the styler on.

2. Set the desired temperature, using the + or - buttons.

3. Wait until the indicator lights turn on - they will tell you when it's ready to use. They come on red first, then blue and green as the styler heats up.

The light combinations represent the 3 different heating ranges. The chart above tells what colors represent what heat ranges.

For example, if you set for the maximum temperature - 445F red, blue and green lights on say it is ready to go - start styling!

If you set it for the middle range, at 338F for example, the red will come on and then the blue - it's ready. If you set your temperature to 320F or below, when the red light only comes on, you are ready to style.

We appreciate your business and want to do everything to ensure you have a 5-Star experience with us.

Without Your Review and Feedback, We Don't Exist.

Your satisfaction is our top priority. If you enjoyed our service and commitment to your satisfaction, please leave us a positive review.

We are committed to our 100% customer satisfaction so if you are not "5-Star Happy" with us or our products then please contact us so we can do whatever it takes to make sure you're 101% pleased.

Not Totally Satisfied?

1, 2 & 3 star ratings are considered unsatisfactory

If you are not completely happy please contact us before leaving negative feedback.
We will do ***whatever it takes*** to make sure you are a raving fan of doing business with us! You are that important to us.

3. ABOUT US

6th Sense Styling Technology is a new company started in 2014 by two partners – Dave and Al. Between us we combine a) a tremendous appreciation of the art of being beautiful. This art form has been women's focus since women have been on Earth!

It's a key component of life. Al is from a family of artists and hairstylists and his father was a top beauty and barber supply salesman in the Detroit area for over 50 years. He's sold in women's retail fashion, jewelry and hair care across the U.S.

Dave brings expertise in manufacturing and distribution from his family business that sold product lines in major retail outlets across the United States.

Together we've created a brand, which we call 6th Sense for short – which is the intuitive faculty of being beautiful and making your surroundings better for it.

We've started our line with one professional tool – the 6th Sense Professional Styler and will follow with more outstanding products to keep you looking great wherever you are!

Again – Thank you for your patronage! We very much appreciate you giving us a try!
